To whom this may regard, I am a proud subscriber of XM Radio and I have to say that it's the best investment i've ever made. Crystal Clear sound, no censorship, and just overall wonderful. I think it would be a shame if the weather and traffic channels were takin' off the service. I listen to the weather channel every morning on the way to school, and I can't wait until the traffic channel is introduced for Mlps/St. Paul MN. I go to college in the twin cities, and the ability to know the weather and traffic in the morning is very important to me. So, please don't take these channels off the air!!!!

Sincerly, John Langevin
